

SmartShape™ Healers

The BioHorizons SmartShape healing system offers new efficient workflows, streamlining the transition from surgical to restorative. The portfolio features a set of stock anatomical profiles, each with a scannable occlusal surface to support digital workflows. The all-metal design allows for verifying the seating of the abutment using a radiograph, and multiple gingival heights will support different placement depths. Custom abutments can be milled to match the anatomical profile of each healer and maintain the tissue contouring with the final restoration.

key features

Matte surface for easy scanning

Occlusal markings for identification and orientation

All-metal design for seating verification

Regular and Tall gingival height options

Profile-matched custom final supported by

streamlined clinical performance

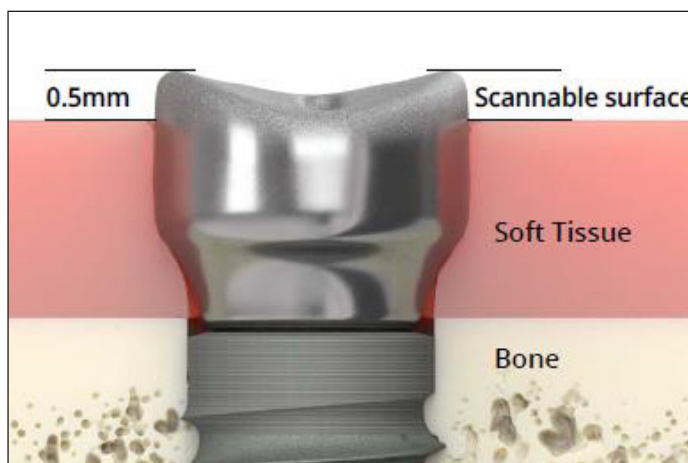

6 anatomical profiles

- Anterior 1 (A1)
- Anterior 2 (A2)
- Mid 1 (M1)
- Mid 2 (M2)
- Posterior 1 (P1)
- Posterior 2 (P2)

scanning & impression

SmartShape Healers support both digital and closed tray impression taking. Traditional impressions can then be digitally converted using a desktop scanner and stone model.

NOTE: 0.5mm of the scannable surface must be left above the tissue for proper scanning or impression taking

occlusal markings

Abutment platform is identified by the occlusal dimples. Connection type is indicated by the orientation of the dimples. Conical abutments have a dimple positioned opposite to the notch, on the lingual/palatal side of the abutment. Dimples on hex abutments are shifted to the mesial or distal sides.

			No Dimple	3.0mm platform (Gray)
			1 Dimple	3.5mm platform (Yellow)
			2 Dimples	4.5mm platform (Green)
			3 Dimples	5.7mm platform (Blue)
			1 Dimple	Narrow platform (Gray)
			2 Dimples	Regular platform (Yellow)

Abutment height is identified by the buccal notch.

	
I	Regular Height
T	Tall Height

Regular height SmartShape Healers can be used in place of 3mm Internal Hex or 4mm Conical healing abutments. Tall height SmartShape Healers can be used in place of 5mm Internal Hex or 6mm Conical healing abutments.

gingival heights

The SmartShape Healers are available in two gingival heights, Regular and Tall. Detailed heights of the abutments are listed in the table below.

Shape	Regular Abutments		Tall Abutments	
	Buccal-Lingual Height	Mesial-Distal Height	Buccal-Lingual Height	Mesial-Distal Height
Anterior	3.5mm	5mm	5.5mm	7mm
Mid	3.75mm	4.5mm	5.75mm	6.5mm
Posterior	4mm		5.5mm	

abutment design

During scan body alignment, it is recommended to select points along the healer's anatomical profile to initiate alignment. The occlusal dimples and notches are only used for visual identification of the healer, not for the digital alignment process.

Updated libraries including SmartShape Healer scan body files can be downloaded from:

Tall height*

Internal Hex abutments are packaged with a silver abutment screw.
Tall screws are identified by a laser-band around the screw shank.

		A1	A2	M1	M2	P1	P2
Hexed	 3.0mm	 TP3SSHA1T	 TP3SSHA2T	 TP3SSH1T	 TP3SSH2T	-	-
	 3.5mm	 PYSSHA1T	 PYSSHA2T	 PYSSH1T	 PYSSH2T	 PYSSHP1T	 PYSSHP2T
	 4.5mm	-	-	-	 PGSSH2T	 PGSSHP1T	 PGSSHP2T
	 5.7mm	-	-	-	-	 PBSSHP1T	 PBSSHP2T

Conical abutments are packaged with a blue abutment screw.
Tall screws are identified by a laser-band around the screw shank.

		A1	A2	M1	M2	P1	P2
