OD Secure abutment system

The OD Secure abutment uses the industry's lowest profile connection to attach dentures and partial dentures to dental implants. With cuff heights ranging from 0.5mm to 6mm, the OD Secure provides attachment solutions for even the most challenging cases. The abutment is designed for easy delivery using an .050" hex driver and is color-coded to ensure that the abutment matches the implant platform every time.

The housing cap that is included with each OD Secure abutment corrects up to 15° of divergence. The new Xtend housing cap corrects up to 25° of divergence and is compatible with the retention caps included in the OD Secure abutment kit.

The OD Secure comes packaged with the abutment, metal housing, four retentive inserts, a lab processing insert and a protection disk.

- L02015-040 OD Secure impression technique module
- L02015-041 OD Secure chairside pick-up using existing denture module

	3.0mm platform	3.5mm platform	4.5mm platform	5.7mm platform
0.5mm cuff height	TP3ODSK0	PYODSK0	PGODSK0	PBODSK0
