

Presented by Drs. Andrew Ferrier & Arshiya Sharafi with Allure Dental Studio's Frank Charles Pope & Larry Stites November 11-12, 2016 • 16 CE Credit Hours

pre-operative

post-operative

TeethXpress® is the latest solution in immediate load therapy that includes advanced technologies in implant dentistry yet maintains affordable treatment costs for patients. Clinicians who use this protocol will benefit their practice by increasing patient acceptance and satisfaction. The two-day course with live surgical and restorative demonstration includes a team approach to full arch conversions with a special focus on patient identification, case acceptance and business development strategies. Attendees who become certified TeethXpress providers will be added to the TeethXpress provider network and will gain full access to the CaseXpress™ armamentarium of practice tools.

Dr. Andrew Ferrier

Dr. Andrew Ferrier earned his dental degree from UCLA and completed the three year Prosthodontic Residency Program at UCSF. For the past 8 years, he has treated patients with full arch immediate load treatment concepts in his private practice and for a dental implant center. He has completed over 1,000 arches and conducted thousands of maintenance visits and patient consultations.

Dr. Arshiya Sharafi

Dr. Arshiya Sharafi attained his dental degree at the University of Maryland Dental School and finished his Oral and Maxillofacial Surgery training at the University of Maryland Medical Center and R. Adam Cowley Shock Trauma Center. Dr. Sharafi has trained extensively in dentoalveolar, orthognathic, maxillofacial trauma, and facial cosmetic surgeries as well as dental implants, reconstructive dental implantology, and benign head and neck pathology. He is one of a handful of Oral and Maxillofacial Surgeons in California who holds the California Cosmetic Surgery License.

Allure Dental Studio

Allure Dental Studio is a nationally recognized dental laboratory specializing in the treatment of the fully edentulous patient. Their specialists are considered leaders in the field of dental implants. They are at the forefront of digital dental technology and work with industry leaders as development partners in creating new techniques and protocols.

clinical training

When proven clinical techniques are applied, immediate occlusal loading has a documented success rate of over 95 percent.¹ In this course, we will demonstrate:

- Live implant surgery and the TeethXpress® method of immediate fixed conversion
- Best practices for applying a team methodology with the surgical specialist, restorative doctor and laboratory
- Predictable implant placement, including anterior/posterior spread, ridge reduction, torque values, vertical dimension, etc.
- How to minimize chair time for optimal patient care and efficiency

marketing training

While many clinicians are well trained in full arch reconstruction, the greater challenge is often understanding how to attract and influence ideal candidates for this procedure. In this course, we will demonstrate:

- How to identify and attract a consistent stream of TeethXpress cases in your practice
- Achieving higher case acceptance for full arch implant dentistry
- How to plant seeds for short & long-term case acceptance with existing patients
- How edentulous, partially-edentulous and fully-dentate immediate load candidates are motivated differently

laboratory training

The TeethXpress treatment planning methodology incorporates the laboratory throughout the process, with special focus on the immediate conversion. Laboratories wishing to become proficient and efficient in full arch immediate load will learn:

- Effective strategies for treatment planning with the surgical specialist and dentist
- Laboratory conversion techniques through a hands-on session and observation of a conversion process during a live surgery
- Systems required for becoming the go-to immediate load laboratory within your local market

schedule

November 11-12, 2016

day one

7:30am-8:00am: Registration
8:00am-12:00pm: Patient Identification & Case Acceptance
12:00pm-1:00pm: Lunch
1:00pm-5:30pm: Treatment Workup & Hands-on Training

day two

8:00am-12:00pm: Live Surgery & Conversion
12:00pm-1:00pm: Lunch
1:00pm-3:00pm: Final Prosthesis
3:00pm-5:30pm: Team Alignment/Implementation

LOCATION

BioHorizons Implant Training Facility

4125 Sorrento Valley Blvd., Suite D
San Diego, CA 92121

registration

Register online at www.regonline.com/teethxpressdelmar

For best results, it is strongly recommended that surgical specialists, referring colleagues and a preferred dental lab representative attend as a team. Surgeons are expected to have intermediate to advanced experience in dental implant surgery. Seating is extremely limited, reserve your space early. Previous sessions have sold out in advance.

TUITION

Surgical Specialist: \$2,995

Accompanying GP: \$995

Accompanying Lab Technician: \$995

CONTACT INFORMATION

Jaclyn Walz, BioHorizons

tel: 205.986.1237 or email: jwalz@biohorizons.com

If BioHorizons must cancel an event, your full tuition will be reimbursed. BioHorizons will not assume responsibility for travel expenses. Should you cancel more than 7 days prior to an event, you will be refunded the full amount that you paid. BioHorizons will not refund no-shows for cancellations the week of an event, instead you will receive credit toward a future event.
