

# MinerOss® Block Allograft

## Improved clinical experience

MinerOss Block Allograft restores bone volume<sup>1</sup> and provides an alternative to harvesting an autogenous block graft from the patient, therefore eliminating the need for a second surgical procedure.

- Helps reduce pain from a secondary surgical site
- Can shorten the patients rehabilitation period by eliminating the need to harvest an autogenous graft

### Applications<sup>2</sup>

- Bone remodeling
- Block grafting procedures
- Bony defects
